CHECK POINT

5 REASONS TO UPGRADE

OR RENEW YOUR CYBER SECURITY WITH CHECK POINT

WHEN IT COMES TO CYBER SECURITY, "SECOND BEST" WILL GET YOU BREACHED.

With the ever-growing threat of malicious cyber attacks, it's more important than ever to ensure your business is protected. Here's why Check Point is the best choice for safeguarding all areas of your operation, so you can continue to thrive unhindered.

1. PREVENTION, NOT JUST DETECTION

Block threats in real time.
When faced with an attack, it isn't enough to do damage control. Rather than simply detecting a breach, Check Point provides real time prevention from the most sophisticated cyber attacks, including emerging zero-day threats.

THERE WAS A 50% INCREASE IN CYBER ATTACKS IN AUSTRALIA IN 2021 COMPARED TO 2020.

CHECK POINT HAS THE BEST INDEPENDENT THIRD-PARTY TEST RESULTS FOR THE HIGHEST SECURITY EFFECTIVENESS, INCLUDING:

100% MALWARE PREVENTION

100% HTTP BLOCK RATE

100% EMAIL BLOCK RATE

100% EXPLOITS BLOCK RATE

100% POST-INFECTION BLOCK RATE

0% FALSE POSITIVES

2. STREAMLINE YOUR OPERATIONS

Check Point offers a unified platform, with one easy licensing agreement and management system. This efficient 'single pane of glass' display makes it easier to monitor and manage your security, freeing up your resources.

UPGRADING TO A HOLISTIC SOLUTION WITH CHECK POINT CAN CUT SECURITY OPERATIONS UP TO 80%.

3. ACCOMMODATE GROWTH & CHANGE

The world is intrinsically dependent on internet and online data, a trend that's spiked in the last two years post-pandemic. With employees working remotely and the global increase in network traffic, you need the best technology to keep your business operating safely and without interruption. Check Point's state-of-the-art hardware can handle higher volumes without compromising security, while flexible, scalable solutions adapt to your specific needs.

NETWORK TRAFFIC INCREASES BY 25% EVERY YEAR

CHECK POINT'S LATEST DEVICES PROVIDE 50 - 70% MORE THROUGHPUT THAN OLDER APPLIANCES.

4. UNRIVALLED VALUE

Check Point's mix-and-match, pay-as-you-grow model gives you the best value, lowering the total cost of operations for your business. Plus, you'll be secure from the staggering costs of an unexpected data breach with the industry's highest catch rate. If you are an existing customer you have investment protection and can trade in your old hardware.

FORTINET AND PALO ALTO MISS 2.3X MORE MALWARE.

Every bit of malware that is missed that enters your organisation could cost you more.

ACCORDING TO PONEMON INSTITUTE'S 2021 STUDY, THE AVERAGE COST OF A DATA BREACH IS $3.7 MILLION AUD.

5. REDUCE YOUR FOOTPRINT

Go green in partnership with a company that strives for sustainability. The efficiency of Check Point's latest technology lowers power consumption, so your business will tread lighter on the planet.

ACHIEVE 2.5X BETTER POWER EFFICIENCY JUST BY UPGRADING TO THE LATEST CHECK POINT HARDWARE.
